Chairman's Statement

for the year ended 31 December 2013

Results

I am pleased to be able to report a profit for the first time since 2009. The restructuring of the Rolling Mill operations has contributed significantly to a reported trading profit of N424 million naira in 2013 against an equivalent loss of N640 million in 2012.

Whilst the business environment during the last year was every bit as challenging as anticipated with spending down and input costs up, the aluminium division benefitted in two areas.

The rationalisation and simplification of the aluminium sheets business brought about significant productivity improvements and the continuing oversupply of materials in the worldwide primary aluminium market resulted in lower than forecast metal prices.

Packaging division had another good year. We are hopeful that a number of our major customers will consolidate their West Africa operations in Nigeria in the near future which will bring additional volumes.

Given the high level of imported raw materials, the Group also benefitted from a stable Naira exchange rate.

Group Summary Financial Information	2013	2012
	N'm	N'm
Turnover	8,390	8,639
Trading profit/ (loss)	424	(640)
Exceptional restructuring cost	-	(525)
Interest charges	(396)	(413)
Profit / (loss) before taxation	28	(1,053)
Total comprehensive profit /(loss)	97	(1,004)

Last year I reported that the Group had not given up hope that manufacturing had ceased permanently in Port Harcourt. Now, one year on, more primary metal companies have closed their rolling mills and only one company is currently manufacturing cold rolled coils in Nigeria.

The hope that Government will create an environment where local manufacturing is no longer disadvantaged is becoming evermore distant. We are able and willing to restart rolling operations but cannot foresee that happening in the near future.

Despite losing the flexibility of own manufacture (and thus not being able to satisfy all demands for ex-stock delivery) volumes remained fairly constant.

Corporate Governance

As a Board we are responsible to the shareholders for increasing shareholder value over the long term through effective management and good governance. The Board considers all aspects of the business necessary to provide good governance including strategy, investments, current performance, risk management and the internal control framework.

Chairman's Statement

for the year ended 31 December 2013

Participation with a wider team of senior managers ensures that the principles and standards set by the Board are inculcated through all levels of our group.

Corporate social responsibility

Our principal value to society lies in what we do every day : providing people with access to good quality affordable products. There is close alignment between our moral obligation and good business practice. We have a modern and efficient supply chain and we are constantly seeking to improve productivity, FAN is committed to embedding sound corporate social responsibility policies and practices as an integral part of our business and is continuing to make progress in its environmental performance, employee engagement and health and safety. During the year we have supported a number of children's charities and schools and are considering a partnership with a leading independent charity to improve basic learning across 100 primary schools by improving the structure of their buildings.

Health and Safety policy aims to develop a culture that is committed to the prevention of injuries and ill health to its employees and others that may be affected by its activities. The Board of Directors and management staff are responsible for implementing this policy and ensure that health and safety considerations are always given priority in planning and in day-to-day activities. Our Health and Safety Policy has been updated to reflect the latest legislative and regulatory requirements

Employees

I would like to thank all our employees for the contribution they have made to the Group's success in the last year.

Dividend

Your Board does not recommend a declaration of dividend.

Outlook

We enter 2014 encouraged that we have a cost competitive business that is able to grow market share albeit in the lead up to elections early in 2015 the economic environment is unpredictable.

Managing Director's Review

for the year ended 31 December 2013

Introduction

2013 proved to be a year of encouraging improvement for First Aluminium in both business areas.

The reorganisation at the Rolling Mill, which took place in mid-December 2012, was a difficult but necessary decision to make, leading to the loss of many jobs but, by operating on a much reduced cost base, it has resulted in the Rolling Mill improving annual profitability by over N500 million. This reorganisation coupled with the supply chain agreement with Hindalco of India significantly improved the financial performance of the Division.

Lower than expected international metal prices helped to offset inflationary increases in the cost base of the business allowing us to keep pricing at 2012 levels thus making our aluminium products more affordable for our customers.

For the first time in many years both paint lines operated throughout the year without major interruption to the gas supply. Improvements to the painting process reduced waste to below 2%, making our paint lines truly cost competitive.

Aluminium sales volumes were similar to 2012 because the government continues to allow the importation of cheap, poor quality, painted coils. First Aluminium is proud of its reputation for supplying high quality materials and will not compromise on its commitment to the customer.

We are reliant on the good people of Nigeria to conclude that it is better to buy quality roofing that lasts rather than substandard materials which have a much shorter lifespan.

The Packaging Division had another successful year, improving contribution to the Group by 19%. This was achieved by a combination of improved product mix, new customers and cost savings. We are considering additional investment in this activity since there is evidence that our principal customers are consolidating their West Africa operations in Nigeria and that will bring additional volumes.

The Company is ready to build on this year's solid achievement by focussing on sales and marketing and growing volumes throughout.

Risks and uncertainties

The effective identification and management of risks and opportunities across the group is necessary to ensure the delivery of the groups objectives. The board has overall responsibility for ensuring risk is effectively managed across the group.

The Board has delegated to the Audit Committee the responsibility for reviewing the effectiveness of the group's system of internal control and the procedures for identification, assessment, management and reporting of risk. Set out below is what the Board considers to be the principal risks and uncertainties facing the group, the mitigating actions for each, and an update of any change in the profile during the course of 2013.

Strategic risk **Failure to grow**

Market risk Political and economic conditions – a sustained period of economic weakness in our markets could have a material adverse effect on the group's results. The group has no influence over inflation, interest rate, exchange rate or other economic factors affecting its business.

Commercial relationships.

The Group has well established long term relationships with a number of customers and suppliers

Financial risk

Movement in metal prices. Aluminium price volatility is the single largest price exposure facing the group. Prices are set with major suppliers based upon the average LME rates over previous periods. Most of our competitors also source their material from overseas and are exposed to the same risk so that in the event of major cost increases the whole market would be forced to pass the increase on to customers.

Exchange rate volatility brings uncertainty in business planning, procurement costs and income statement exposures. Our risk management committee sets agreed risk tolerance levels of exposure to US\$.

Operational risk

Availability of material – failure of key supplier. The group sources its product from a leading metal supplier that claims to be the third largest in the world in this market. As an international commodity Aluminium is quoted on and available from a number of international markets.

Recruitment and retention of key staff. The departure of senior management or the lack of an appropriately skilled workforce could impact the group's ability to perform in line with expectations.

Liquidity and going concern

The directors have assessed the future funding requirements of the group and compared it to committed bank facilities for up to 15 months from the balance sheet date. The assessment included a sensitivity analysis of the key factors which could affect future cash flow and funding requirements. Having undertaken this work the directors are of the opinion that the group has adequate resources to fund its operations for the foreseeable future and so determine that it is appropriate to prepare the accounts on a going concern basis.

Directors' Report

for the year ended 31 December 2013

The Directors submit to the members of the Company, the audited Financial Statements of the group for the year ended 31 December 2013.

1. PRINCIPAL ACTIVITIES

The Company is engaged in the manufacture of aluminium coils, sheets, and laminate, aluminium and seamless tubes. The Company's finished products are used as raw materials by the secondary aluminium and packaging industries.

2. REVIEW OF THE BUSINESS

Foreign exchange was available throughout the year, at a rate similar to the previous year. The exchange rate began the year at N158/\$1, it appreciated N157.8/\$1 and eventually closed the year at N158.8/\$1

Bank lending rates ranged between 18% to 21% per annum in the course of the year. The minimum rediscount rate (MRR), CBN's bench mark for Bank lending witnessed upwards changes in the year, as the CBN tried to use the MPR window to curtail inflation and exchange rate devaluation. MPR closed the year at 12%.

The import duty rate on aluminium coil was maintained at 5% throughout the year.

The LME cash price for aluminium, which represents approximately 70% of the material cost of our business, declined from \$2,072 per tonne during the year and closed at \$1,764

3. FUTURE DEVELOPMENTS IN THE BUSINESS

The Company continues to encourage the usage of aluminium rolled products in the country. The Company plans to continually improve capacity utilization as well as diversify its products base.

4. BOARD OF DIRECTORS

The Directors of the Company were:

Alhaji Sulaiman Sulaiman Baffa	-	Chairman
Mr. Ben Elfrink	-	Managing Director (resigned August 2 2013)

Mr. John Dixon	1,261,200	1,261,200
Engr. Mike O. Okolo	77,000	77,000
Miss Eniye Ambakederemo	-	-

There were no changes between the balance sheet date and the date of approval of these financial statements.

Chief J. N. Ajene is interested in Chartered Aluminium Systems Plc which engages in arms length trading transactions with the Company.

No other director has notified the company for the purpose of Section 277 of the Companies And Allied Matters Act, 1990, of any declarable interest in contracts with which the company is involved.

8. RESULTS FOR THE YEAR

The group results for the year are summarized as follows:

	2013	2012

Directors' Report

for the year ended 31 December 2013

9. ACQUISITION OF THE COMPANY'S SHARES BY THE COMPANY

As at 31 December 2013 the Company did not acquire any of its shares and the disclosure under Schedule 5 of the Companies and Allied Matters Act 1990 is not applicable.

10. SIGNIFICANT CHANGES IN PROPERTY, PLANT and EQUIPMENT

Details of movements during the year are as set out in Note 7 to the Financial Statements

11. SIGNIFICANT POST BALANCE SHEET EVENTS

There have been no significant events occurring after 31 December, 2013, which should have been included in these Financial Statements.

12. DISTRIBUTORS OF THE COMPANY'S PRODUCTS

The Company's finished products are sold as raw materials to a number of secondary aluminium and packaging companies directly. No distributors were used.

13. RESEARCH AND DEVELOPMENT

The Company is committed to research and development activities to secure its position as a market leader in its industries.

The Company recognizes that per capita income consumption of aluminium in Nigeria is now improving, although it is still low compared with other countries, including BRICS. Consequently, the Company on a continual basis allocates funds to development efforts to broaden the usage of aluminium in the country.

14. DONATIONS AND GIFTS

There were neither donations nor gifts that need to be disclosed in this financial statement as required by the Companies and Allied Matters Acts.

15. EMPLOYEE'S HEALTH, SAFETY AND WELFARE

The Company's policy is to ensure that a high quality of hygiene and good housekeeping is maintained. The work environment is kept conducive and safe.

There is a designated Health & Safety Officer for each location, and an external safety consultant visits the Company regularly to inspect the facilities, carry out safety audit and advise on safety issues.

The Company also carries out safety and fire drills regularly.

Employee's health is of prime importance and the Company operates its own clinics at the factories and reimburses the cost of outside medical treatment.

Canteen facilities are available in the company's factories.

16. EMPLOYEE'S INVOLVEMENT AND TRAINING

In line with the Company's policy of continual development of its human resources, a series of courses and training programmes were organised for employees in various departments.

The courses were well designed to broaden their technical/professional knowledge and managerial skills.

Through the meetings of the joint consultative councils and quarterly meetings with the Group Managing Director the Company ensures that all employees are informed of the state of the Company's operations and corporate activities.

17. REPORTING TO SHAREHOLDERS

The Group sends to each shareholder a copy of the Annual Report and Financial Statements. Copies of the full Annual Report and Financial Statements will be delivered to the Corporate Affairs Commission after being laid before the Annual General Meeting.

Copies of this report can be obtained from the Company Secretary and from the Company's Registrar Alternatively it may be downloaded from the Company's website and printed.

18. AUDITORS

In accordance with Section 357(2) of the Companies and Allied Matters Act CAP C20 Laws of the Federation of Nigeria 2004, Messrs BDO Professional Services have indicated their willingness to continue in office as auditors of the Company.

REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBERS OF FIRST ALUMINIUM NIGERIA PLC AND ITS SUBSIDIARY COMPANY

We have audited the accompanying financial statements of First Aluminium Nigeria Plc ("the company") and its subsidiary company ("the Group") for the financial year ended 31 December 2013, which comprises the income statement, statement of financial position, statement of changes in equity, statement of cash flows for the year then ended, and notes to the financial statements on pages 32 to 48. The financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the Federal Government of Nigeria.

Directors' responsibility for the Financial Statements

The directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board, and in compliance with relevant provisions of the Financial Reporting Council of Nigeria Act, No 6, 2011 and the Companies and Allied Matters Act, CAP C20 LFN 2004. This responsibility includes: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditors' responsibility

Our responsibility is to express an independent opinion on the financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform our audit to obtain reasonable assurance that the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the state of affairs of the Group's financial position as at 31 December 2013 and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and in compliance with the relevant provisions of the Financial Reporting Council of Nigeria Act No 6, 2011, and the Companies and Allied Matters Act, CAP C20 LFN 2004.

Report on other legal requirements

The Companies and Allied Matters Act, CAP C20 LFN, 2004 requires that in carrying out our audit, we consider and report to you on the following matters. We confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- ii) in our opinion, proper books of account have been kept by the Company; and
- iii) the Company's statement of financial position and income statement are in agreement with the books of account.

Significant Accounting Policies

for the year ended 31 December 2013

A. General Information

First Aluminium Nigeria PLC ('the company') and its wholly owned subsidiary (together 'the group') manufacture and distribute aluminium coils, sheets, and laminate, aluminium and seamless tubes.

The company is a public limited company incorporated and domiciled in Nigeria. The address of its registered office is 2 Akilo Street, Ogba, Ikeja, Lagos. These group consolidated financial statements were authorized for issue by the board of directors on 13 March 2014

B. Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these Consolidated Annual Financial Statements are set out below.

C. Basis of presentation

The Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the Financial Reporting Council of Nigeria. The Consolidated Financial Statements have been prepared (and disclosed) in the functional currency (Nigerian Naira), rounded to the nearest thousand, and prepared under the historical cost convention as modified by the revaluation of land and buildings, available for sale investments and financial assets and financial liabilities at fair value through the profit and loss.

D. Estimates and judgments

The preparation of accounts in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based upon historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis of making judgments about carrying values of assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates. The significant judgments made in the accounts for the year ended December 31, 2013 are: Retirement Obligations – these are more fully described in accounting policy below and in note 19 to the financial statements; and expected future life of specialized plant and equipment – these are more fully described in note 7 to the financial statements.

E. Consolidation

Subsidiary undertakings, which are those companies in which the holding company, directly or indirectly has an interest of more than half the voting rights or otherwise has power to control, have been consolidated where necessary. All intercompany transactions, balances and unrealized profits and losses on transactions between group companies have been eliminated. Where necessary, accounting policies for subsidiaries have been changed to ensure consistency with the policies adopted by the holding company.

F. Turnover

Turnover is recognized when goods are delivered to customers and services completed, and is disclosed net of any trade discount, returns or allowances.

G. Accounting for contracts

The company has not entered into any long term contracts during the last year. Contracts are accounted for using the completed – contract method with revenue and costs being recognized at the completion of the contract.

Significant Accounting Policies

for the year ended 31 December 2013

H. Foreign currency

Amounts denominated in foreign currency are translated into the functional currency at the date of the transaction. Foreign currency monetary assets and liabilities are translated into the functional currency at the exchange rate applicable at the balance sheet date. Exchange differences are taken to operating profit.

I. Property, Plant, Equipment And Depreciation

Property, plant and equipment is stated at cost or valuation, less accumulated depreciation and any recognized impairment loss. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets at the following annual rates;

Plant and machinery	10%
Furniture and equipment	20%
Motor vehicles	25%

Buildings are depreciated over the unexpired lease period. Leasehold land is not depreciated.

A gain or loss on disposal is determined by comparing the proceeds with the asset's carrying amount and is recognized in the income statement.

Buildings are professionally revalued at approximately 5 yearly intervals on an open market basis by independent qualified surveyors and valuers. Open market means current cost of reconstruction together with improvements in today's market adequately depreciated to reflect physical wear and tear, age, functional and economic obsolescence plus the site value in its existing use as at the date of inspection.

At each balance sheet date the Group reviews the carrying amounts of its property, plant and equipment to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

J. Finance leases

Leased assets are stated at their fair values and are capitalized on installation, and depreciated in line with the company policy on depreciation of the related class of fixed assets. The finance cost of the leases are charged to the profit and loss account in account in accordance with the lease terms.

K. Investment in subsidiary

Investments in subsidiaries are stated at the lower of cost or the company's share of their net tangible asset values at the year end.

L. Trade receivables

Trade receivables are recognized initially at the transaction price less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the group will not be able to collect all amounts due according to the original terms of the receivables. Receivables are stated at their gross value less appropriate provision for bad and doubtful balances.

Significant Accounting Policies

for the year ended 31 December 2013

M Cash and cash equivalents, derivative financial instruments and other financial instruments

Cash at bank and in hand includes short term deposits with a maturity date of three months or less .

Derivative financial instruments, in particular forward exchange currency contracts can be used to manage the financial risks associated with the underlying business activities and the financing of those activities. The group does not undertake any trading activity in derivative financial instruments. Forward contracts are the only derivative financial instrument the group intends to use at this time – principally because of lack of other products to hedge Naira exchange risk.

All other financial instruments are recognized at fair value plus transaction costs. Unhedged borrowings are measured at amortised cost and all other financial assets and liabilities including short term receivables and payables are measured at amortised cost less any impairment provision.

N Inventories

Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost is determined using the first-in, first-out method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based upon normal operating capacity). At the reporting date inventories are assessed for impairment. If inventory is impaired the carrying amount is reduced to its selling price less costs to complete and sell. The impairment loss is immediately recognized in profit or loss.

O Retirement benefits scheme

The Company operates a gratuity scheme and pension fund scheme for the benefit of its employees.

a. Pension Fund Scheme – The Company, in line with the provisions of the Pension Reform Act 2004, operates a defined contribution pension scheme for its employee. Contributions to the scheme are funded through payroll deductions, while the Company's contribution is charged to the profit and loss account.

b. End of Service Gratuity Scheme ('EOSB') - The gratuity scheme is unfunded. Members of staff who have spent 5 years or more in employment are entitled to a one-off payment upon retirement (for whatever reason). Retirement from the Company is mandatory upon reaching 55. The payment is based upon the final emoluments of the staff and the length of service. The benefit is calculated annually.

Gains or losses on curtailment or settlement are recognised in the profit or loss when the curtailment or settlement occurs. The liability recognised is the present value of the obligation determined on the assumption that every employee remains until their mandatory retirement.

The Scheme exposes the Group to a number of risks:

Interest rate risk. The Scheme's liabilities are assessed using market yields on high quality corporate bonds to discount the liabilities.

Inflation risk. Benefits under the scheme are linked to salary inflation

Mortality and withdrawal risk. In the event that a large number of members were to leave service or die in service within a short period this could put a strain on the cashflow position.

Significant Accounting Policies

for the year ended 31 December 2013

P Taxation

- a. Income tax – Income tax is provided on taxable profits at the current statutory tax rate.
- b. Deferred tax – Provision for deferred taxation is made when income, expenditure or depreciation falls into different periods for accounting and for taxation purposes. The provision is calculated at the rate of taxation current at the balance sheet date.

Q Dividend

Dividend distribution to the Company Shareholders is recognised as a liability in the Financial Statements in the year in which the dividends are approved by the Company Shareholders.

Unclaimed dividends are amounts payable to shareholders in respect of dividends previously declared by the Company which have remained unclaimed by the shareholder. In compliance with Section 385 of the Companies and Allied Matter Act (Cap C20) Laws of the Federation of Nigeria 2004, unclaimed dividends are transferred to general reserves after twelve years.

A list of unclaimed dividends is set out on pages 55 to 82

R Provisions and contingencies

Provisions are recognized when the group has a present obligation as a result of a past event and a reliable estimate can be made of a probable adverse income. Material contingent liabilities are disclosed unless the transfer of economic benefits is remote.

S Segment information

For management purposes the group is organized into two operating segments – aluminium and packaging. A business segment is a distinguishable component of the Group engaged in providing products or services that are subject to risks and returns that are different from those of other business segment.

A geographical segment is a component of the Group engaged in providing products or services within a particular economic environment that are subject to risks and returns different from those of a segment operating in other economic environments. Operating segments are reported in a manner consistent with internal reporting.

T New and amended IFRS standards adopted by the Group during the year

The Group adopted new and amended IFRSs and IFRIC interpretations with no material impact on results.

U IFRS standards and interpretations in issue not yet adopted

International Accounting Standards (IAS/IFRS)	Effective date for period commencing
IFRS 10 Consolidated Financial Statements	1 January 2014
IFRS 11 Joint Arrangements	1 January 2014
IFRS 12 Disclosure of interests in Other Entities	1 January 2014
IAS32 Offsetting Financial Assets and Financial Liabilities	1 January 2014
IFRS 7 Financial Instruments Disclosures	1 January 2015
IFRS 9 Financial Instruments	1 January 2015

Significant Accounting Policies

for the year ended 31 December 2013

The Group is assessing the impact of these standards and interpretations or amendments that are not yet effective. These are not currently expected to have any material impact on the Group's reported profit, earnings per share, net assets or disclosures as set out below:

- IFRS 7 Disclosures – Transfers of Financial Assets may require a number of changes to disclosures but does not affect reported results or net assets of the group. The Group does not have any enforceable netting arrangements envisaged by the standard (and is not currently considering entering into such arrangements) so no additional quantitative or qualitative disclosures are envisaged.
- IFRS 9 Financial Instruments originally issued November 2009 as the first stage of the IASB's project to review and replace IAS 39 – Financial Instruments Recognition and Measurement. IFRS 9 requires financial assets to be classified into two measurement categories: those measured at fair value and those measured at amortised cost. The determination is made at initial recognition. The main change is that in cases where the fair value option is taken for financial liabilities the part of the fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than in the income statement unless this creates an accounting mismatch.
- IFRS 10 Consolidated Financial Statements. The standard defines the principle of control and establishes control as the basis for determining which entities are consolidated in the consolidated financial statements. This standard will have no effect on the reported results or the net assets since the group comprises only the holding company and one non-trading wholly owned subsidiary (Aluminium City Limited).
- IFRS 11 Joint Arrangements. The standard requires a party in a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations arising from the arrangement. Currently this standard will have no effect on the reported results or the net assets since the group has not entered into any such arrangements and does not currently intend doing so.
- IFRS 12 Disclosure of interests in other entities. The standard requires an entity to disclose information that enables users of financial statements to evaluate the nature of and risks associated with its interests in other entities and the effects of those interests in its financial position, financial performance and cash flows. Currently this standard will have no effect on the reported results or the net assets since the group does not have any interest in any entity other than its wholly owned non-trading subsidiary (Aluminium City Limited).
- IAS 32 Financial Instruments Presentation – Amendments - outlines the accounting requirements for the presentation of financial instruments, particularly as to the classification of such instruments into financial assets, financial liabilities and equity instruments. The standard provides guidance on the classification of related interest, dividends and gains/losses, and when financial assets and financial liabilities can be offset. The fundamental principle of IAS 32 is that a financial instrument should be classified as either a financial liability or an equity instrument according to the substance of the contract, not its legal form, and the definitions of financial liability and equity instrument. When adopted for the December 31 2014 year end there will be no impact in respect of its accounting treatment.

1 THE GROUP

First Aluminium Nigeria Plc was incorporated on 20th August 1960 as Alcan Aluminium of Nigeria Limited, a subsidiary of Alcan Aluminium Company of Canada, one of the world's foremost international aluminium companies. The name of the company was changed to First Aluminium Company (Nigeria) Limited when it became a subsidiary of Alucon Holdings SA, a wholly owned subsidiary within the Inlaks Group, based in Monte Carlo. On 10 May 1991, the company changed its name to First Aluminium Company (Nigeria) Plc and on 23rd July 1992, to First Aluminium Nigeria Plc. It became a quoted company on 5 November 1992.

The company is engaged in the manufacture of aluminium coils and sheets which represent the raw materials of the Nigerian aluminium industry. A continuous sheet painting line was commissioned in November 1992 to service the painted aluminium products market. The product from this painting line is branded Colortek.

The company also has a Packaging Division which manufactures tubes for the toothpaste, pharmaceutical, cosmetics and engineering industries in Nigeria from laminate plastics and from aluminium.

Aluminium City Limited was incorporated on 21 September 1995 as a wholly-owned subsidiary of First Aluminium Nigeria Plc and commenced business on 1 February 1996. It was engaged in the purchase and sale of aluminium products, building components and accessory items and maintained a strong commercial relationship with First Aluminium Nigeria Plc. During 2010 the Company ceased trading. Its assets less liabilities were transferred to the Rolling Mill division at no profit. All retained employees transferred to the rolling mill and their service was treated as continuous.

The principal plant and equipment assets are depreciated over their useful life as determined by the plant engineers and certified by the unit head. In many cases this means that old assets that have been fully depreciated are 're-lived' since the company still uses them and continues to do so.

Expenditure subsequent to 1 Jan 2011 has been capitalised only when it is probable that it will give rise to future economic benefits in excess of the originally assessed standard of performance or when it significantly extends the useful life of an asset.

Leasehold land and buildings were last revalued in October 2009 by Jide Taiwo & Co, a professional firm of Estate Surveyors and Valuers on the basis of open market capital values. The assets are reflected in this financial statement at that valuation. Assets other than Leasehold land and buildings are stated at cost.

Notes to the Financial Statements

for the year ended 31 December 2013

Costs accumulated under construction work in progress are not depreciated until the completion and use of the assets. Following the revaluation of Land and Building in 2009, the depreciation policy of the Company on Land and Building was changed such that the asset will be depreciated over the unexpired lease period.

Balance 1 January	-	5,822	-	5,822
Impairment	-	(5,822)	-	(5,822)
Balance 31, December	-	-	-	-

This represents 4,735,146 ordinary shares of 50 kobo each of the company reserved for the Employees Trust Scheme. The indebtedness is being recovered from dividend accruing on these shares, in accordance with the trust deed, on the basis of 50% of the net dividend receivable by the trustees on these shares.

In view of the fact that the Company has not declared dividend for the past five years, the outstanding balance on the long term receivable is deemed irrecoverable and has been impaired to zero value in 2012.

As at 31 December 2013, the Company had available Bank loans and overdraft facilities including commercial paper amounting to N3.8 billion (2012; N4.1 billion) out of which N2.3 billion (2012; N2.7 billion) was utilized. The facilities are secured with negative pledge on the Company's assets, stock hypothecation backed by letter of pledge and trust receipt, lien on shipping documents and the goods imported drafts and cheques in clearing, and facility drawdown tenored against specific transactions.

FOREIGN EXCHANGE RISK

The Group considers the most significant foreign exchange risk relates to the US dollar since that is how all of the aluminium division's raw materials and a large proportion of the packaging division's raw materials (including slugs and plastic resins) are priced. These materials are paid for on Letters of Credit ('LC') via the Import Finance facilities of our principal banks. The risk management committee, the audit committee and ultimately the Board considers what proportion of the Group's liabilities should be confirmed (initially) in US dollar. Arrangements exist with our banks which enable us (at no cost) to swap out of a dollar denominated liability into a Naira liability. The Group would consider such an action if it believed a devaluation in the Naira, over the duration of an open LC and / or Bills for Collection, would be greater than the interest to be saved on a dollar denominated liability rather than a naira one – because of the interest arbitrage. The Group does not hedge translational exposure.

The table below sets out the effect on profit or loss in respect of financial liabilities denominated in foreign currency.

Year	currency	Change in rate	Effect on profit
2013	US Dollar	± 1 Naira	40 Million Naira
2012	US dollar	± 1 Naira	40 Million Naira

As more fully described in the Managing Director's report, the group is exposed to financial and operational risk. However the board considered that the exchange rate risk is the most significant.

Under IFRS the Gratuity scheme in FAN is considered a Defined Benefit scheme since the company is obliged to pay a sum of money when an employee leaves or reaches the mandatory retirement age of 55. The company has no further obligation to ex-employees beyond the sum paid on retirement / withdrawal.

In recent years the gratuity to all junior and senior staff was paid out in cash so our liability principally represents our obligation to management.

Under IFRS we have to calculate what the net present value of the liability is assuming everybody works until 55. This involves estimating future wage inflation but also a rate at which cash could be invested so as to grow to maturity on each employee's 55th birthday.

The valuation of the retirement obligations was undertaken by independent actuaries as at 31 December 2013.

Demographic Assumptions

Due to the lack of availability of published reliable data in Nigeria the rates of mortality assumed for employees are the rates published in the A67/70 Ultimate Tables published jointly by the Institute and Faculty of Actuaries in the UK. Withdrawal from service data is taken from published data of large Nigerian employers

Notes to the Financial Statements

for the year ended 31 December 2013

Actuarial assumptions

	31 December 2013	31 December 2012
Discount rate	14%	8%
Salary increases	10%	10%
Mortality assumption	A 1967 - 70 tables	None
Withdrawal assumption	2% pa for under 30, 1.5% pa for ages 31-39, 1% pa for ages 40-44, none for age 45 or over	None

The principal assumptions used to calculate the Scheme's liabilities include

Case	Change(%)
Base case	-
Salary increases +1%	5.8%
Discount % -1%	6.2%

Since we have less than 39 employees in the scheme we have not applied the demographics to the calculation of the deferred obligation. If the demographics were to be applied it would serve to reduce the liability but would accelerate the date on which benefit were to be paid.
